

# PAY-IN MACHINES (PIM)

IN TODAY'S WORLD CUSTOMER DEMANDS AND EXPECTATIONS MOVE FAST

Convenient, intelligent and secure self-service solutions

ACKNOWLEDGED SPECIALISTS IN DELIVERING AUTOMATED SELF SERVICE SOLUTIONS

Automated Cash Deposits help you deliver more efficient Self-Service solutions. Our range of Pay-In Machines, has been designed either for free standing, external or in the wall installation.

New technology has raised your customers' expectations, and whilst they may come from many different backgrounds, lifestyles and professions, your customers have one thing in common:

Choice of leisure time, work patterns, shopping, and the choice of how, when and with whom they carry out their banking requirements. In this competitive environment the winners are responding to their customers needs, and improving the banking experience with

**A convenient customer service**

**A modern retail environment**

**Faster transactions and improved security**

**Extended hours access to services**

Communications – complete with a monitoring system to constantly verify operation and status of the PIM, whether remotely or centrally located. A file transfer utility is also available for retrieving audit and event history files.

#### Typical Applications:

##### **Banks and other financial institutions**

personal and business customers making cash/cheque deposits

##### **Local Government Offices**

payment of rents, taxes, court fines, parking fines

##### **Utility company Offices**

payment of water, gas, electricity, telephone bills

##### **Transport**

airline cabin crew, bus or train drivers and conductors who need to deposit fares or payments received

##### **Retail Outlets**

convenient cash deposit system for daily takings and offers customers a paying in point for store cards

All 4000 series models are future proof, in the

The PIM's can be operated either by card access, barcode reader or by keypad depression and offer screen-based animations to encourage high customer migration and to provide easy guidance throughout the deposit procedure. It can be configured as an off-line unit or as part of a fully networked system, providing real time data capture. The PIM is ergonomically designed to accommodate Disability Discrimination Act compliance, is adaptable to any location and offers increased brand awareness with your own customisation.

These are examples from the screen based animations which encourage high customer usage and provide easy guidance through the entire transaction

### We have a Worldwide network of strategic partners and distributors

Banking Automation has developed a valuable network of strategic partners and distributors, to help represent the Company on a Worldwide basis.

We are firm in the belief that there is no substitute for using local knowledge in order to fully understand local issues, practices and culture.

Each of these organisations is a specialist in cash handling products and the successful implementation of self-service equipment.
